

Experience at M-Enabling Summit 2018**Brief**

The M-Enabling Summit is an annual affair that promotes as well as emphasizes the importance of accessibility for the elderly and those with special needs in the society. With a different theme each year, this summit brings together organizations, professionals and thought leaders working to build an inclusive society leveraging technology. Themed this year on “Accessible and Assistive

Technologies Innovations: New Frontiers for Independent Living”, QA InfoTech, was also a part of the summit both as a sponsor and a panel member and I was fortunate to represent the company.

While I have taken part in many conferences, this one was special for me, taking part in the panel with several other esteemed jury members.

As I commenced my journey from India to Washington DC, I witnessed how an inclusive society has become the need of the hour. Despite being a person with visual disability I chose to travel alone and with the assistance of the Airlines, my travel was overall a smooth experience.

The summit officially commenced on 11th July. A key note session as a welcome address followed by Jenny Lay-Flurrie’s talk, (the Chief Accessibility Officer at Microsoft) discussed how the Redmond giant is progressively utilizing the potential of Artificial Intelligence and Machine Learning in hackathons as an attempt to develop remarkable applications for hearing and blind people. Alongside her were also other speakers who spoke about the way their organisations are striving to develop and design inclusive software to empower those facing diverse challenges in the society. While the sessions and panel discussions continued throughout the day, I, along with my senior colleague, had the opportunity to network with several attendees to show case what QA InfoTech had to offer in the world of Accessibility. We engaged with various attendees and participants, through our booth, explaining what it takes to make websites, web apps, mobile apps and documents accessible for people with special needs. Several acknowledged and appreciated our work in this space and it was exciting to see some interested in collaborating with us in future endeavours.

On 12th June, 2018, I was a speaker at the panel discussion on accessibility in the work place.

Through my talk, I introduced to all present there, QA InfoTech’s Accessibilitometer and the workings of the same. I also spoke about how our organisation has driven the process of making an inclusive environment by ensuring E2E access and ease of use of all our internal tools and infrastructure.

Being a part of the summit and listening to opinions, ideas and strategies by such eminent speakers was truly inspiring for me. I am grateful to our CEO Mukesh Sharma, the backbone of our organisation, for giving me this life-changing journey and opportunity.

QA InfoTech Services

QA InfoTech Technology: Provides services in the following areas

- ✓ Software Testing
- ✓ Software Test Automation
- ✓ Software Development
- ✓ Software Deployment
- ✓ Data Analytics

QA InfoTech Operations: Operate retail business processes as service on behalf of client

- ✓ Product Cataloguing
- ✓ Tutorial Writing

- ✓ Blog Writing
- ✓ Customer Support
- ✓ Training

About QA InfoTech

QA InfoTech's team of experts have both the ability and flexibility to leverage any popular state-of-the-art performance tools or utilize QAIT's custom framework built around a rich supply of open source performance testing options. We at QA InfoTech create and execute scripts in a very consistent, measurable and reusable manner to mirror client's live production environment, user loads, business patterns and throughput which are applicable and also accommodative of their future growth projection.

At QA InfoTech (an ISO 9001:2008, 20000-1:2005, 27001:2005 and CMMI Level III certified company), we specialize in providing **independent offshore software testing** and, unbiased **software quality assurance** services to product companies, ranging from start-ups to fortune 500s. Established in 2003, with less than five testing experts, QA InfoTech has grown leaps and bounds with three QA Centers of Excellence globally; two of which are located in the hub of IT activity in India, Noida, and the other, our affiliate QA InfoTech Inc. Michigan USA.

In 2010 and 2011, QA InfoTech has been ranked in the top 100 places to work for in India. Being an independent offshore software testing company, QA InfoTech maintains a distinguished level of service which blends top quality with cost effective solutions. The forceful combination of our highly skilled Test Engineers, Domain Experts and our investment in latest technologies ensures an End-to-End Coverage for our client's products. We bring together best practices and strategies to cater to the unique software QA testing needs. Our team members are committed to creating and innovating QA / Testing solutions to challenging technical projects by using the range of customized service models which are aligned with our client's needs and goals.

"We assure the highest degree of Excellence and Accuracy in our engagements. Once you have placed your trust with us, rest assured we guarantee an elated peace of mind"
